Triple wavelength (530/570/620nm) photometer for professional water analysis of pools and spas

In-built but changeable cuvette allows quick water sampling by just dipping in the IP68 waterproof PoolLab. PoolLab with its 6 buttons is designed for instant access to the parameters installed, which are: pH, Chlorine (free/combined/total), Alkalinity (acid capacity), Cyanuric Acid (stabilizer), Active Oxygen (mps), Bromine, Chlorine Dioxide, Ozone and Hydrogen peroxide.

AS POOLLAB USES WIRELESS BLUETOOTH 4.0 TECHNOLOGY, IT CAN EASILY BE CONNECTED TO FREE SOFTWARE AND APP FOR TEST RESULT MANAGEMENT.

Once test results are synchronised, software and app allow dosage recommendations, based on individually entered water treatment chemicals. User can print test result reports, perform index calculation, such as LSI, and much more. A free cloud server takes care that data on app and software are constantly synchronised, if the user decides to use this feature.

BASIC KIT

- 1x PoolLab with Bluetooth 4.0 IP68 waterproof
- 1x Transparent plastic case
- 1x Light shield
- 1x Plastic stirring rod
- 1x 10ml syringe
- 3x AAA batteries
- 1x manual
- Free access to PoolLab software
- Free access to PoolLab app
- Free access to PoolLab cloud

PARAMETERS

- Chlorine (FREE/COMBINED/TOTAL)
- PH-Value
- Alkalinity (ACID CAPACITY)
- Cyanuric Acid (STABILIZER)
- Active Oxygen (MPS)*
- Bromine**
- Chlorine Dioxide **
- Ozone**
- Hydrogen Peroxide*

*requires reagent tablets not included in basic kit.
**requires Glycine reagent tablets if chlorine is present.
Glycine reagent tablets are not included in the basic kit.

REAGENTS

- 20 tablets Phenol Red
- 20 tablets DPD #1
- 20 tablets DPD #3
- 10 tablets Alkalinity-M
- 10 tablets CYA-Test
- all tablets are Photometer grade*
